## Objective

I seek to work as a Junior Front-End Developer in a team that values innovation and creativity, contributing to the creation of intuitive interfaces and impactful experiences for users. My goal is to apply and expand my knowledge in technologies such as HTML, CSS, and JavaScript, collaborating on projects that unite aesthetics and functionality.

## Professional Summary

I am a Front-End Developer in training, passionate about creating modern, responsive, and intuitive web interfaces. Currently, I am enhancing my skills in HTML5, CSS3, and development best practices through the Web Developers Course at DevQuest. I have practical experience in developing a complete website (siegvfx.com) and maintain an active GitHub repository, where I share projects reflecting my progress and dedication to continuous learning. I seek opportunities to contribute to challenging projects, applying my technical knowledge while improving my skills. My focus is on delivering efficient solutions that offer the best user experience, and I am eager to collaborate with dynamic teams, adding value and growing as a professional in the Front-End field.

## Education

- **SENAI - Internet Computing Technician** – Jan/2019 - Dec/2021
- **Uninassau – Computer Science** – Starting Feb/2025 (ongoing)

## Courses and Certifications

- **Dev Quest - Dev em Dobro - Front-End Web Development** – Course with monitoring and support – May/2024 – Currently enrolled.

## Languages

- Advanced English

## Professional Experience

### **AlmaViva – Customer Service Representative – June/2023 - April/2024**

- Worked on customer retention, developing argumentation and negotiation skills to identify their needs, solve problems effectively, and ensure satisfaction with the company.
- Performed post-service activities, reversing cancellation situations through consultative and empathetic service.
- Organized and scheduled technical visits, prioritizing customer convenience by offering the best available dates and times.

- Promoted the company's services, aligning the offered solutions with customer demands and expectations.

## Personal Projects

- **Sieg Portfolio**

This project is a portfolio developed for a graphic designer focused on showcasing their projects and discussing their journey. The project emphasized responsive design and coding best practices.
